idee

su misura

Bespoke ideas

Esporre fuori dagli schemi? Ecco alcune idee

Guardami negli occhi: l'esposizione è verticale, due differenti livelli ma sempre all'altezza degli occhi, per catturare al meglio lo sguardo.

Appeal senza barriere: le vasche sono a filo piano, soltanto il vetro separa il cliente dai prodotti. Nessuna barriera, nessun elemento di disturbo: per un'esposizione di grande appeal.

Il cassetto delle meraviglie: tra le tante soluzioni previste, ecco anche la vetrina a cassettoni, ideale per chi ha poco spazio e vuole esporre al meglio una ricca varietà di prodotti.

Un piccolo capolavoro: l'esposizione può essere anche a teca. Così le dimensioni ridotte del piano espositivo trasformano un limite in un punto di forza catalizzando l'attenzione sul prodotto.

Il gelato goloso: la riscoperta dei pozzetti gelato. Un ritorno all'infanzia e alla tradizione. Un elemento caratterizzante, reinterpretato in chiave attuale.

Need display solutions with a difference? Here are some ideas.

Look into my eyes: a vertical display on two different levels that remain at eye level, to capture attention effectively.

Appeal with no barriers: basins are at floor level, only glass separates the customer from the product. No barrier or element of disturbance; a display with great appeal.

The drawer of wonders: a wealth of solutions including a display cabinet with drawers, perfect for those with limited space wishing to display a rich variety of products.

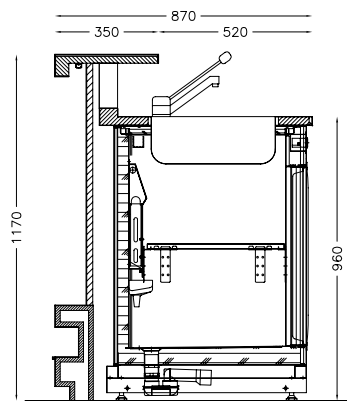

A little work of art: displays may also be a showcase. Thus the smaller size of the display area transforms a limitation into a strength by focussing attention on the product.

Luscious ice cream: the rediscovery of ice cream served from individual covered wells. A return to childhood and tradition. A distinguishing feature, reinterpreted with a modern feel.
